THE PROBLEM

Every day without direction is **money that won't come back.**

If any of these sound familiar, you're leaving money and time on the table:

Drowning in paperwork

Hours on invoices, expenses and records that don't earn you a cent.

Invisible leaks

Overdue invoices, runaway costs, discounts you never ask for.

Flying blind

No CFO to tell you, today and with your numbers, where you stand.

Your business stops when you do

No one watches or acts outside your working hours.

THE SOLUTION

CEO is your autonomous AI director.

An elite CFO and CEO that **knows YOUR business** (you define its DNA in the CAI Manifesto), works **24/7**, speaks **your language with a human voice** and **never makes up a figure**: everything it says comes from your real data. It's not just another piece of software; it's the director your business couldn't afford... until now.

A full management team — no payroll, no offices.

THE IDEA, MADE SIMPLE

It's like hiring a real CEO.

Hiring CEO works just like bringing a flesh-and-blood executive director into your business... except this one **never sleeps, never leaves and costs a fraction.**

1

Introduce your company

You show it your business and all your stakeholders: clients, suppliers, team and operations.

2

Set its objectives

You make your goals, rules and priorities clear in your CAI Manifesto. That's its roadmap.

3

And it operates at once

From minute one it gets to work for you: it analyses, decides, communicates and executes. 24/7.

IN ONE SENTENCE

You set the vision; CEO runs the direction. The same role as a flesh-and-blood director —introduction, objectives and execution— but available instantly, with no payroll and working for you without rest.

An executive director, ready in minutes.

ceocai.com

Run and control your entire business.

Every feature works on your real data, with total isolation and in your language.

Real-time CFO

Audits your business, spots leaks and opportunities and chases your goals.

Insight, trends & forecast

On open: the number that matters today, your 30-day trend and future scenarios.

Dual economy: Business + Home

Both worlds under control, in a single smart dashboard.

Smart: you teach it (CAI)

You define its DNA —rules, tone, country, currency— and it learns your business.

Sector specialisation

You pick your sector and CEO fine-tunes: jargon and EU, national, regional and local regulations.

Automatic quotes

The AI generates them in seconds, fully editable, and it learns from each one.

Connected calculation engines

Links to your calculation apps to size any installation with precision.

Project & site tracking

Keep your ongoing projects and sites under control, start to finish.

It communicates, connects and **sells for you.**

It doesn't just analyse: it acts, negotiates and keeps your client base alive.

Native voice

Replies with a human, accent-free voice in the language of each message.

Sends emails for you... in your voice

Writes and sends emails, and even voice notes, on your behalf.

Lives in your pocket (Telegram)

Alerts and direct communication with you during your working hours.

Connects to everything

Excel, your ERP and countless apps. Import and export without typing; the AI maps it.

Negotiates for you, with everyone

Analyses suppliers, distributors, clients and partners in real time for the best terms.

Builds client loyalty

Detects inactive clients and offers to re-engage them. It nurtures your base for you.

Full mailing-list management (LIS)

Organises your contacts and launches personalised bulk campaigns.

Smart extractor

Reads your documents and pulls the data itself, with no typing.

Talk to it in any language

By chat or Telegram, in any language: CEO always replies in that same one, instantly.

Emails in each client's language

Writes to every client automatically in THEIR language. Instant translation built in.

...and it improves itself: it learns your business every day.
